Atlantikwall

Batteries and Bunkers

The German Atlantikwall was set up as a gigantic coastal defence system along the West-European coasts, consisting of hundreds of batteries and thousands of infantry positions.

The book describes its origin, development, concept and components. The standard fortifications, the Regelbauten, constitute the framework of the defence line. Their design, together with their distribution from Norway to the Franco-Spanish border is taken as guideline in order to reconstruct the history of the Atlantic Rampart.
